

Coding has never been Cooler!

Introduction to Java

CIS170

This Course Counts as a Programming Course

This Course Is Part of the Web Design Degree and Certification

Prerequisite: CPS 111 and a programming course

Students for whom concepts such as Windows, menus, Web pages, and the Internet are familiar will use Java to create applets and programs for Windows applications. This course covers the Java programming environment, control structures, arrays, strings, characters, graphics, files, Java utilities, and bit manipulation.

August 22nd to December 12th

Wednesday 5:30 PM – 7:29 PM
